

Inspiring Service

Accelerated leadership Team development.
New leader or even a whole new team? This is an experience that builds the relationships and trust they need to perform.

“I can expect a great deal more now from my team, and I’ve learned I need to give more too” Chief Information Officer

We’re different because we blend emotional intelligence expertise with business experience, a focus on performance and common sense. We’ve led businesses at CEO level and delivered transformational programmes that work with people in unique ways. Teams experience a deeper understanding of their relationship and learn how to apply skills, as they tackle real work issues. **It’s a successful approach and a powerful experience.**

Accelerated Leadership Team development programmes

- ① Meeting to tailor and agree the event to fit your teams requirements. Team 360
- ② 2/3 day experiential workshop:
 - to create a vision, based on a mix of personal values and business objectives, for what the team needs to deliver and how they will go about it
 - to develop awareness & skill around emotional intelligence leadership skills
 - application of these new skills to real issues & build a new team dynamic
 - agreement & creation of a new set of productive leadership team behaviours
- ③ A follow up learning review, to notice change, embed & sustain progress, with the option of additional 1:1 targeted coaching where/if required.

Why do this?

- “Team cultural fit” is one of the biggest challenges facing new leaders to teams
- To enable potential for more open, honest conversations & better decision making
- Ego’s are getting in the way and there is a gap between intentions & actual impact
- A new Leader, a challenging year ahead & you need the team perform now.
